

Mall-Dawn™ Features

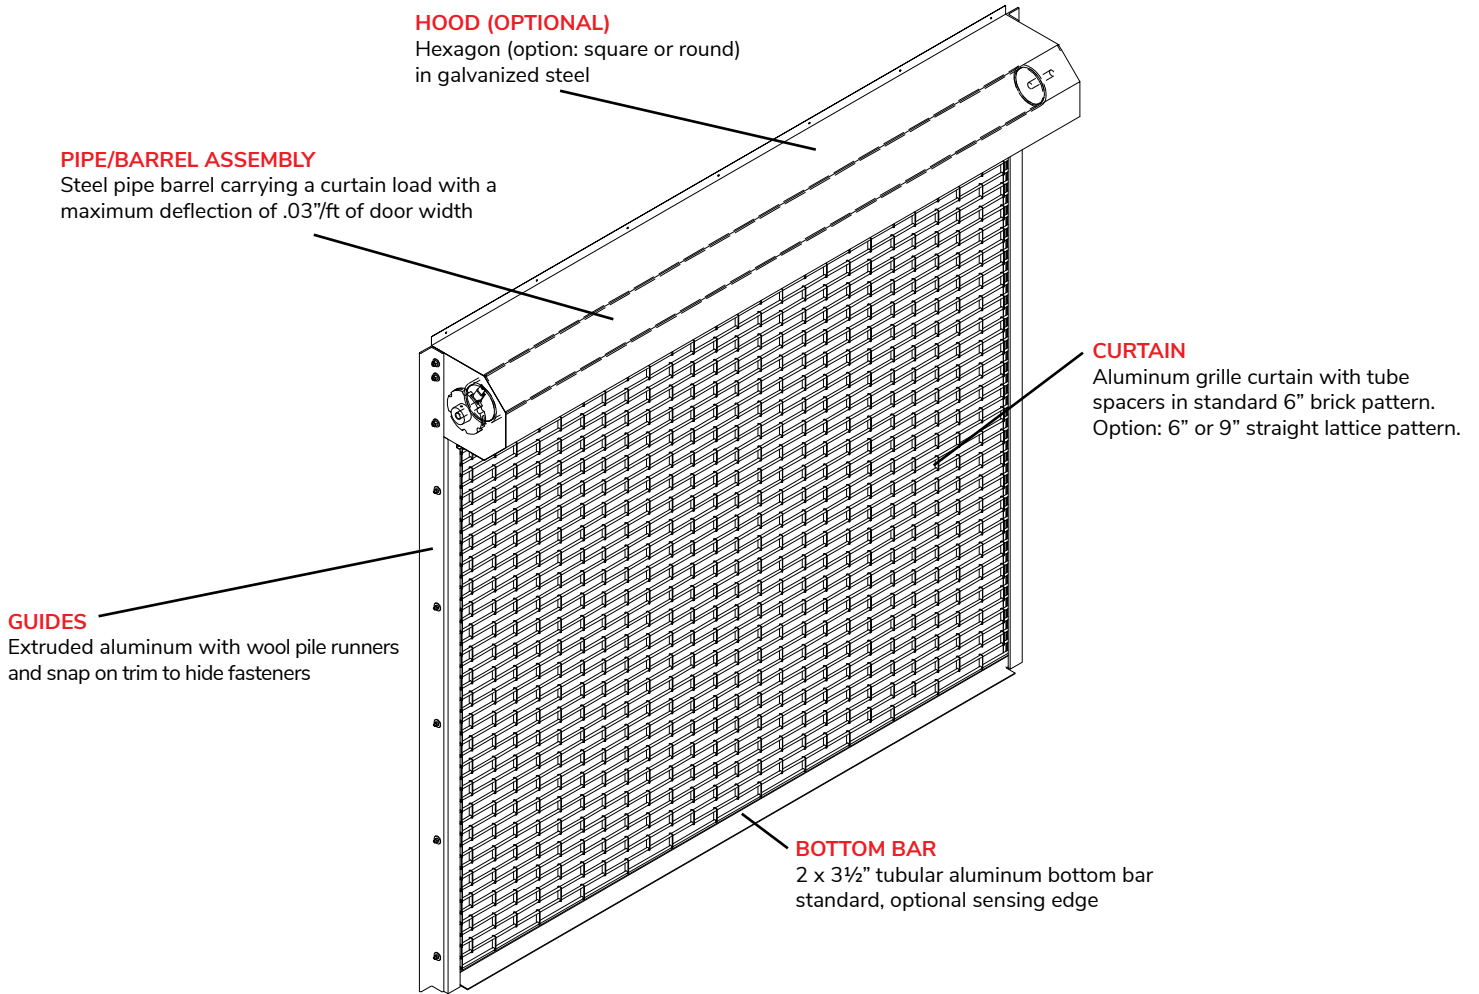

- Security with an open appearance
- Heavy duty curtain construction with tube spacers over 5/16" horizontal rods
- Curtains available in aluminum or stainless steel

Alpine's Mall-Dawn™ is the ideal security gate for malls, schools, parking garages, store fronts, and manufacturing facilities that require security, visibility and ventilation.

Functional Benefits

- Horizontal rods: Solid 5/16" galvanized, option for Aluminum Anodized or Stainless Steel Sleeves.
- Vertical spacing: Aluminum or Stainless Steel vertical links, 2" on center
- Continuous end links with lock washers are designed to prevent the curtain from leaving the guide rails
- Available in standard 6" brick pattern, 6" or 9" straight lattice pattern as an option
- Extruded aluminum guides with wool pile runners and snap on trim to hide fasteners
- 2" x 3 1/2" tubular aluminum bottom bar standard

Operational Requirements

- Choice of electric operator, hand chain, hand crank, or push up dependent on dimensions of security gate

Optional Materials and Finishes

- **Curtain:** Solid 5/16" rods in galvanized, stainless or aluminum covered by 6" or 9" tube spacers
- **Finish:** Tube spacers available in aluminum or stainless steel
